## PROFESSIONAL SUMMARY

Detail-oriented Technical Support professional with 1+ year of hands-on experience in client query resolution, technical troubleshooting, SLA adherence, and quality monitoring in a BPO/contact centre environment. Proven ability to document incidents, prepare technical MIS reports, track performance KPIs, and train agents — directly aligned with the Wipro Production Specialist L1 role. Adept at following standard operating procedures, escalating critical issues, and maintaining high customer satisfaction benchmarks. Additional expertise in data management using Microsoft Excel and dashboard development, enabling strong analytical and technical writing capabilities.

## KEY SKILLS

### Technical Support & Helpdesk

Client Query Resolution (L1/L2)  
SLA Compliance & Escalation  
Ticket Tracking & Documentation  
First Call Resolution (FCR)

### Technical Writing & Reporting

MIS Reports & KPI Dashboards  
Call Log & Incident Documentation  
SOPs & Self-Help Knowledge Base  
Trend Analysis & Root Cause

### Quality & Operations

Quality Monitoring & Coaching  
Microsoft Excel (Adv. Reporting)  
Performance Metrics Tracking  
Cross-functional Team Coordination

## PROFESSIONAL EXPERIENCE

### Level 2 – CEPS Agent (Consumer Electronics Product Specialist)

**Alldigi Tech Limited**

*Jul 2024 – Sep 2025*

*Technical Support, Quality Monitoring & MIS Reporting*

- Monitored and analyzed agent calls to ensure accurate troubleshooting and strict adherence to process SOPs and quality standards — directly mirroring the Production Specialist L1 mandate.
- Prepared and maintained MIS reports on agent KPIs, resolution rates, NPU (No Parts Usage) trends, and operational performance metrics for management review — core technical writing output.
- Documented call logs, identified recurring issue patterns, and created self-help knowledge base articles to reduce repeat queries and improve first-contact resolution rates.
- Provided structured coaching and feedback sessions to agents, translating performance data into actionable corrective plans — akin to managing SLA-based process improvement.
- Conducted technical training sessions focused on product knowledge and NPU reduction, ensuring team readiness aligned with client quality benchmarks.
- Collaborated with team leads to design corrective action plans based on trend data and escalation patterns, ensuring compliance with contract SLAs.
- Tracked and validated performance data using Microsoft Excel; prepared accurate weekly and monthly operational reports with zero-defect data standards.

### Level 1 – AV Support Agent

**Alldigi Tech Limited**

*Within Above Tenure (9 Months)*

*Inbound Technical Support – Television & Soundbar Products*

- Fielded inbound technical support requests via telephone and email for Television and Soundbar products, delivering first-call resolution with high customer satisfaction.
- Documented all end-user interactions — including identification details, issue descriptions, troubleshooting steps, and resolution outcomes — using designated tracking software.
- Followed standard processes and knowledge base resources to resolve client queries within defined SLA timelines; escalated unresolved or high-risk cases to team leaders promptly.

- Provided step-by-step product guidance to customers in a user-friendly, professional manner, building strong domain knowledge in consumer electronics AV products.
- Made scheduled follow-up callbacks to customers to confirm resolution compliance and gather feedback, ensuring adherence to contractual SLA requirements.

## Multi-Tasking Agent (MTA)

**Alldigi Tech Limited**

*Within Above Tenure (3 Months)*

### *Data Management & Client Operations*

- Executed client-based data projects with accurate and timely delivery, applying technical writing principles to document data processes and outcomes.
- Managed, validated, and cleaned client datasets using Microsoft Excel to ensure data quality, accuracy, and compliance with client specifications.
- Coordinated between operational teams to ensure smooth data handover and on-time project completion, maintaining clear documentation throughout.

## Frontend Developer Intern

**Nithra Apps, Tamil Nadu**

*Feb 2026 – Present*

- Developing a full-stack MERN application (Movie Ticket Booking System) with real-time data integration, RESTful APIs, and role-based dashboards — showcasing ability to build technical reporting tools.
- Documented technical architecture, API contracts, and component specifications as part of standard development practice, reinforcing technical writing capability.

## TECHNICAL WRITING HIGHLIGHTS

---

### *Demonstrated technical writing output relevant to the Production Specialist L1 role:*

- MIS Reports: Prepared regular performance reports covering agent KPIs, resolution rates, and operational metrics distributed to management teams.
- Process Documentation: Created SOPs and self-help knowledge base articles to standardize troubleshooting procedures and reduce average handling time.
- Incident Logs: Maintained structured call and email logs capturing issue details, resolution steps, and outcomes using tracking platforms.
- Training Materials: Developed coaching content and training documentation for NPU reduction and quality improvement programmes.
- Corrective Action Plans: Authored data-backed improvement plans in collaboration with team leads based on trend and gap analysis.

## EDUCATION & CERTIFICATIONS

---

### **B.E. – Computer Science and Engineering**

Al-Ameen Engineering College, Tamil Nadu

CGPA: 7.9 / 10

### **Certifications:**

Python for Everybody – Coursera  
(University of Michigan)
